

Losberger Inflatable Decon Cabin Systems

Losberger Decon Cabins are engineered for field operations where there is a need for a robust, mobile solution that can be quickly deployable. Decon Cabins Inflate in 60 seconds or less with an air cylinder or an electrical blower and would be immediately ready for use.

They offer a safe, robust, and mobile solution in case of pandemic diseases or chemical contamination. Losberger Inflatable Decon Cabins are fitted with an in-built shower system which can be fed with clear water or water mixed with decontamination chemicals. Additional retention basins can also be used in conjunction with the shower systems. Available in 3 sizes.

Fast / Easy Deployment

Inflates in 60 Seconds or less with just one person using compressed air or an electrical inflator.

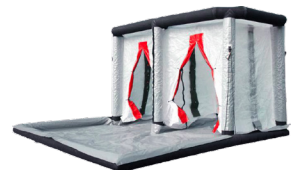

Robust & Stable

Robust and stable, Decon Cabins can tolerate environmental changes, as well as continuous heavy use.

Self-Contained System

Inflatable rubber frame, integrated basin, shower strips with nozzles (21 l/min), and water drainage.
